Biomembranes

Vol. 1112, 1992

Cumulative Contents

Regular Papers

Interaction of melittin derivatives with lipid bilayer membrane. Role of basic residues at the C-terminal and their replacement with lactose
K. Otoda, S. Kimura and Y. Imanishi (Japan) 1

Properties and the primary structure of a new halorhodopsin from halobacterial strain mex
J. Otomo, H. Tomioka and H. Sasabe (Japan) 7

Effects of alcohols on fluorescence anisotropies of diphenylhexatriene and its derivatives in bovine blood platelets: relationships of the depth-dependent change in membrane fluidity by alcohols with their effects on platelet aggregation and adenylate cyclase activity
S. Kitagawa and H. Hirata (Japan) 14

Monolayer study of plastoquinones, α-tocopherol quinone, their hydroquinone forms and their interaction with monogalactosyldiacylglycerol. Charge-transfer complexes in a mixed monolayer
J. Kruk, K. Strzałka and R.M. Leblanc (Poland, Canada) 19

Highly selective blockade of the frog skin sodium channels by monovalent copper cations
I.A. Skulskii and A.V. Lapin (Russia) 27

A patch-clamp study of *Bacillus subtilis*
I. Szabó, V. Petronilli and M. Zoratti (Italy) 29

A volume-sensitive chloride conductance revealed in cultured human keratinocytes by $^{36}Cl^-$ efflux and whole-cell patch clamp recording
M. Rugolo, T. Mastrocola, M. De Luca, G. Romeo and L.J.V. Galietta (Italy) 39

Atrial natriuretic peptide degradation by CPA47 cells: evidence for a divalent cation-independent cell-surface proteolytic activity
S.J. Frost, Y.M. Chen and P.A. Whitson (USA) 45

Phase behaviour and molecular species composition of oat root plasma membrane lipids. Influence of induced dehydration tolerance
P. Norberg, L. Engström, R. Nilsson and C. Liljenberg (Sweden) 52

A new system for bilayer lipid membrane capacitance measurements: method, apparatus and applications
S. Kalinowski and Z. Figaszewski (Poland) 57

Single Ca^{2+}-activated K^+ channels in human erythrocytes: Ca^{2+} dependence of opening frequency but not of open lifetimes
T. Leinders, R.G.D.M. Van Kleef and H.P.M. Vijverberg (Netherlands) 67

Distinct metal ion binding sites on Ca^{2+}-activated K^+ channels in inside-out patches of human erythrocytes
T. Leinders, R.G.D.M. Van Kleef and H.P.M. Vijverberg (Netherlands) 75

Glycolipid-anchored acetylcholinesterases from rabbit lymphocytes and erythrocytes differ in their sensitivity to phosphatidylinositol-specific phospholipase C
P. Richier, M. Arpagaus and J.-P. Toutant (France) 83

Adenosine triphosphatases during maturation of cultured human skeletal muscle cells and in adult human muscle
A.A.G.M. Benders, T.H.M.S.M. Van Kuppevelt, A. Oosterhof, R.A. Wevers and J.H. Veerkamp (Netherlands) 89

Abolition with chloramine-T of inactivation in barnacle muscle fibers results in stimulation of the ouabain-insensitive sodium efflux
J.-R. Wu, Z. Zhou and E.E. Bittar (USA) 99

Modulation by glycosphingolipids of membrane–membrane interactions induced by myelin basic protein and melittin
B. Maggio and R.K. Yu (USA) 105

Carrier-mediated glutamate secretion by *Corynebacterium glutamicum* under biotin limitation
M. Gutmann, C. Hoischen and R. Krämer (Germany) 115

Comparative analysis of latrotoxin channels of different conductance in planar lipid bilayers. Evidence for cluster organization
O.V. Krasilnikov and R.Z. Sabirov (Uzbekistan) 124

Sequence analysis of the catalytic subunit of H^+-ATPase from porcine renal brush-border membranes
I. Sander, F. Lottspeich, H. Appelhans, E. Kojro, J. Spangenberg, C. Weindel, W. Haase and H. Koepsell (Germany) 129

Spectroscopic investigations of the potential-sensitive membrane probe RH421
R.J. Clarke, P. Schrimpf and M. Schöneich (Germany) 142

Carrier-mediated transport system for choline and its related quaternary ammonium compounds on rat intestinal brush-border membrane
H. Saitoh, M. Kobayashi, M. Sugawara, K. Iseki and K. Miyazaki (Japan) 153

Regular Papers

Simultaneous measurements of the intra- and extra-cellular oxygen concentration in viable cells
H. Hu, G. Sosnovsky and H.M. Swartz (USA) 161

Cefaclor uptake by the proton-dependent dipeptide transport carrier of human intestinal Caco-2 cells and comparison to cephalexin uptake
A.H. Dantzig, L.B. Tabas and L. Bergin (USA) 167

Identification of two general diffusion channels in the outer membrane of pea mitochondria
A. Schmid, S. Krömer, H.W. Heldt and R. Benz (Germany) 174

Vasopressin elevation of Na^+/H^+ exchange is inhibited by genistein in human blood platelets
O. Aharonovits, M. Zik, A.A. Livne and Y. Granot (Israel) 181

The conformational behaviour of phosphatidylinositol in model membranes: ^{2}H-NMR studies
P.M. Hansbro, S.J. Byard, R.J. Bushby, P.J.H. Turnbull, N. Boden, M.R. Saunders, R. Novelli and D.G. Reid (UK) 187

Shear stress-facilitated calcium ion transport across lipid bilayers
S.R. Chakravarthy and T.D. Giorgio (USA) 197

Isolation of the plasma membrane and organelles from Chinese hamster ovary cells
L. Cezanne, L. Navarro and J.-F. Tocanne (France) 205

Analysis of thiol-topography in Na,K-ATPase using labelling with different maleimide nitroxide derivatives
M. Esmann, K. Hideg and D. Marsh (Denmark, Hungary, Germany) 215

Influence of retinoids on phosphatidylethanolamine lipid polymorphism
A. Ortiz, F.J. Aranda, J. Villalaín and J.C. Gómez-Fernández (Spain) 226

Structure and activity studies of pardaxin and analogues using model membranes of phosphatidylcholine
C.J. Barrow, K. Nakanishi and K. Tachibana (Japan) 235

Potassium and calcium currents activated by foetal calf serum in Balb-c 3T3 fibroblasts
D. Lovisolo, L. Munaron, F.M. Baccino and G. Bonelli (Italy) 241

Determination of the sidedness of the C-terminal region of the gastric H,K-ATPase α subunit
D.R. Scott, K. Munson, N. Modyanov and G. Sachs (USA, Russia) 246

Interaction of synthetic glycophospholipids with phospholipid bilayer membranes
Y.S. Park and L. Huang (USA) 251

Effect of bovine prothrombin fragment 1 on the translational diffusion of phospholipids in Langmuir-Blodgett monolayers
Z. Huang, K.H. Pearce and N.L. Thompson (USA) 259

Comparative theoretical study of the conformations of amphotericin methyl ester and amphotericin B polar heads in the presence of water
S. Meddeb, J. Bergès, J. Caillet and J. Langlet (France) 266

Ethanol effects on the stratum corneum lipid phase behavior
S.L. Krill, K. Knutson and W.I. Higuchi (USA) 273

The stratum corneum lipid thermotropic phase behavior
S.L. Krill, K. Knutson and W.I. Higuchi (USA) 281

Rapid Report

Voltage-dependent Ca^{2+} channels in the plasma membrane and the vacuolar membrane of *Arabidopsis thaliana*
Z. Ping, I. Yabe and S. Muto (Japan) 287

Titles of related papers in other sections 291
